

American Recovery and Reinvestment Act Buy American Clause

The *American Recovery and Reinvestment Act* was enacted into law on February 17, 2009. An important part of the act was a Buy American clause which requires that all iron and steel (such as rebar and structural steel) and manufactured goods (such as valves and hydrants) be produced in the United States.

This letter is to certify that all of the valve and hydrant products from American AVK comply with the requirements of the American Reinvestment and Recovery Act of 2009.

American AVK is a proud American manufacturer of valves and hydrants used in the water and wastewater industry. Our manufacturing facility is located in Minden, Nevada, USA.

For more information, please contact American AVK.

On behalf of American AVK,

A handwritten signature in black ink that reads "John Wilber".
